

After this training you:

- > have knowledge of all the aspects related to an academic literature search
- > can use a systematic approach to searching
- > be self-sufficient in discovering more tools and services

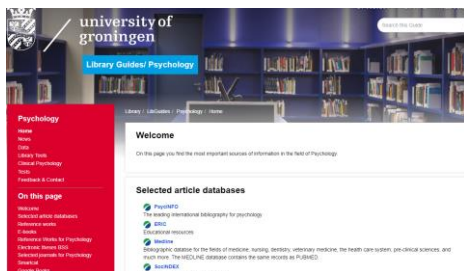

Scientific information

- > What is scientific?
- > Can I use regular media sources?
- > Access to scientific literature with library services

The 7 step search guide

1. Defining your subject
2. Determining your search terms
3. Selecting databases
4. Searching for publications
5. Getting the publications that you selected
6. Evaluating publications and internet sources
7. Processing your sources

LibGuides.rug.nl

Search plan

The PRO search

TS=(("Perception" OR "sensory perception" OR "sensory integration") AND "Animal*" AND ("Robot*" OR "Artificial intelligence" OR "autonomous vehicle*") AND ("Navigation" OR "path finding" OR "wayfinding" OR "steering"))

Advantages of academic databases vs Google scholar

- > Precise search on topic and source types
- > Advanced search options
- > Filter options
- > Citation sorting
- > Exporting reference lists

Correct citing (APA)

Geleta, D. K., & Manshahia, M. S. (2020). Gravitational search algorithm-based optimization of hybrid wind and solar renewable energy system. *Computational Intelligence*. <https://doi.org/10.1111/coin.12336>
